Getting the Bugs Out David Kiley 2002-04-22 The fascinating story of Volkswagen's raging success and near collapse in America After a wild ride of ups and downs for almost three decades, Volkswagen has regained its stature as one of America's most beloved auto makers. In *Getting the Bugs Out*, journalist and auto industry expert David Kiley tells the complete story of the rise, fall, and comeback of Volkswagen. Kiley traces the company's rise from Ferdinand Porsche's original design for the Beetle, through the Nazi era, and up to the Beetle's ascendancy during the flower-power 1960s. He explores the reasons for VW's downward spiral through the 1970s and 1980s, including the devastating management blunders that led to such failed efforts as the Rabbit, Dasher, Thing, and Scirocco, and equally catastrophic marketing initiatives, culminating in the notorious "Fahrfeignugen" series of ads. Finally, drawing upon his unique access to company insiders, Kiley tells the story of how Volkswagen achieved its phenomenal comeback beginning in the late 1990s through a combination of visionary management, cutting-edge product development, and brilliant marketing and advertising strategies. David Kiley (Anne Arbor, MI), the Detroit Bureau Chief at USA Today, is a journalist with fifteen years of experience, ten of which have been devoted to covering the auto industry. He has written extensively for *Adweek* and *Brandweek* magazines.

Mustang by Design James Dinsmore 2018-09-14 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Without question, the 1964-1/2 Mustang is one of the most important and influential cars in automotive history. When Ford launched the Mustang, it created an automotive revolution. Award-winning designer and stylist Gale Halderman was at the epicenter of the action at Ford, and, in fact, his initial design sketch formed the basis of the new Mustang. He reveals his involvement in the project as well as telling the entire story of the design and development of the Mustang. Authors and Mustang enthusiasts James Dinsmore and James Halderman go beyond the front doors at Ford into the design center, testing grounds, and Ford facilities to get the real, unvarnished story. Gale Halderman offers a unique behind-the-scenes perspective and firsthand account of the inception, design, development, and production of the original Mustang. With stinging losses from the Edsel fresh in minds at Ford, the Mustang project was an uphill battle from day one. Lee Iacocca and his assembled team had a herculean task to convince Henry Ford II to take a risk on a new concept of automobile, but with the help of Hal Sperlich's detailed market research, the project received the green light. Henry Ford II made it clear that jobs were on the line, including Iacocca's, if it failed. The process of taking a car from sketch to clay model to prototype to preproduction and finally finished model is retraced in insightful detail. During the process, many fascinating experimental cars, such as the Mustang I two-seater, Mustang II prototype, Mustang Allegro, and Shorty, were built. But eventually the Mustang, based on the existing Ford Falcon, received the nod for final production. In a gala event, it was unveiled at the 1964 World's Fair in New York. The Mustang received public accolades and critical acclaim, and soon it became a runaway hit. After the initial success, Ford designers and Gale Halderman designed and developed the first fastback Mustangs to compliment the coupes. The classic Mustang muscle cars to follow, including the GT, Mach 1, and others, are profiled as well. The Mustang changed automotive history and ushered in the pony car era as a nimble, powerful, and elegantly styled sports coupe. But it could so easily have stumbled and wound up on the scrap pile of failed new projects. This is the remarkable and dramatic story of how the Mustang came to life, the demanding design and development process, and, ultimately, the triumph of the iconic American car.

Weld Award for Biography A Sunday Times Best Paperback of 2022 'Brilliant, heart-stopping ... reads like a thriller, a memoir and a provocative piece of literary fiction all at the same time ... magical and compelling' Washington Post 'How do I love thee? Let me count the ways,' Elizabeth Barrett Browning famously wrote, shortly before defying her family by running away to Italy with Robert Browning. But behind the romance of her extraordinary life stands a thoroughly modern figure, who remains an electrifying study in self-invention. Elizabeth was born in 1806, a time when women could neither attend university nor vote, and yet she achieved lasting literary fame. She remains Britain's greatest woman poet, whose work has inspired writers from Emily Dickinson to George Eliot and Virginia Woolf. This vividly written biography, the first full study for over thirty years, incorporates recent archival discoveries to reveal the woman herself: a literary giant and a high-profile activist for the abolition of slavery who believed herself to be of mixed heritage; and a writer who defied chronic illness and long-term disability to change the course of cultural history. It holds up a mirror to the woman, her art - and the art of biography itself.

[Introduction to Mythology](#) Eva M. Thury 2009 Introduction to Mythology:

Contemporary Approaches to Classical and World Myths introduces students to a wide range of myths from various critical perspectives. Featuring original texts from sources around the world, it includes readings from Greek and Roman classics (by Homer, Hesiod, Ovid, and other writers); Nordic mythology (by Snorri Sturluson); Hindu culture (The Ramayana); Chinese mythology (Nu Kwa); and from such ancient works as The Epic of Gilgamesh, the Bible, and, new to this edition, the Enuma Elish. Selections from Native-American sources and fairy tales and stories from Africa, Germany, and the United States are also included. In addition, the authors draw comparisons between classical myths and such contemporary cultural phenomena as Daniel Boone, The Wizard of Oz, and, new to this edition, Firefly and Harry Potter. They also incorporate readings by Carl Jung, Levi-Strauss, Victor Turner, and other theorists who consider mythic material from different analytical perspectives. Finally, works by Milton, Keats, Updike, and Joyce are presented as examples of modern literary texts with mythological roots. The selections are organized into seven topical sections: myths of creation and destruction; hero and trickster myths; ritual and myth; myths and dreams; folktale and myth; contemporary myths; and myths and literature.

High and Mighty Keith Bradsher 2004-01-19 SUVs have taken over America's roads. Ad campaigns promote them as safer and "greener" than ordinary cars and easy to handle in bad weather. But very little about the SUV's image is accurate. They poorly protect occupants and inflict horrific damage in crashes, they guzzle

gasoline, and they are hard to control. Keith Bradsher has been at the forefront in reporting the calamitous safety and environmental record of SUVs, including the notorious Ford-Firestone rollover controversy. In *High and Mighty*, he traces the checkered history of SUVs, showing how they came to be classified not as passenger cars but as light trucks, which are subject to less strict regulations on safety, gas mileage, and air pollution. He makes a powerful case that these vehicles are even worse than we suspect--for their occupants, for other motorists, for pedestrians and for the planet itself. In the tradition of *Unsafe at Any Speed* and *Fast Food Nation*, Bradsher's book is a damning exposé of an industry that puts us all at risk, whether we recognize it or not.
