*Devi Ations* Ashok Banker 2018-04-19 As the plane left the runway of LaGuardia and the lights of New York city fell far below and behind her, Karen had a moment of terrible foreboding. I'm never coming back, she thought. And bit her tongue hard enough to draw blood.' Read the story to find out if Karen made it out alive! Ashok Banker assaults the senses through shock and awe in this powerful, dark and haunting story. Exploring overarching themes of equality, social justice and feminism, this tale is refreshingly original.

*China Cabin* Hillary Don 2017-05-01 China Cabin is an account of the restoration of the aft deck-house of the wooden sidewheel paddle steamship China, built in 1867. The 20 feet by 46 feet fragment is the only existing relic in the world of the ships built by one of America's foremost wooden ship designer and builder--William Henry Webb (1816-1899). Webb designed and built 137 exceptional wooden ships, from an iron-clad warship sold to Napoleon III of France to famous Clipper sailing ships. China was constructed in 1866-67 for initiation of the Pacific Mail Steamship Company's (PMSSC) transpacific mail, freight and passenger service from San Francisco to Hong Kong, and from China via Yokohama, Japan. Deemed by some to be obsolete at birth because more efficient and fire-resistant metal screw-propelled steamships were being built in the United Kingdom, China was laid off by PMSSC in 1882. Sold for scrap in 1885, China was set afire for her metals, on the Tiburon peninsula in 1886. However, all potentially saleable items were saved before burning, including the aft deckhouse, composed of the Social Hall and the staterooms of the ship's surgeon and chief engineer. The structures saved were sold and was used as a residence or, partitioned across the middle, as two residences, for 93 years. Resting on pilings along the shore of Belvedere Cove, it was to be demolished by 1979 to allow for open-space at its site. Belvedere-Tiburon Landmarks Society, led by Beverly Wright Bastian Meyers, stepped forward to save this historical reminder of early wooden sidewheel paddle steamships, one of the most significant maritime historical structures on the West Coast of the United States. Invitations to a Captain's Dinner on the restored China Cabin on 11 July, 1986, marked completion of the magnificent restoration to its state when it was first-built. The cost was near to a million dollars, a few pennies short of the cost of constructing the entire original wooden sidewheel paddle steamship China. The whole cost was borne by the Belvedere-Tiburon Landmarks Society's fund raising and volunteer activities, fulfilling its original pledge to the penny.

*Conversations with Greil Marcus* Joe Bonomo 2012-10-01 Greil Marcus once said to an interviewer, "There is an infinite amount of meaning about anything, and I free associate." For more than four decades, Marcus has explored the connections among figures, sounds, and events in culture, relating unrelated points of departure, mapping alternate histories and surprising correspondences. He is a unique and influential voice in American letters. Marcus was born in 1945 in San Francisco. In 1968 he published his first piece, a review of Magic Bus: The Who on Tour, in Rolling Stone, where he became the magazine's first records editor. Renowned for his ongoing "Real Life Top Ten" column, Marcus has been a writer for a number of magazines and websites, and is the author and editor of over fifteen books. His critique is egalitarian: no figure, object, or event is too high, low, celebrated, or obscure for an inquiry into the ways in which our lives can open outward, often unexpectedly. In *Conversations with Greil Marcus*, Marcus discusses in lively, wide-ranging interviews his books and columns as well as his critical methodology and broad approach to his material, signaled by a generosity of spirit leavened with aggressive critical standards.

*Komodo Dragons* James B. Murphy 2015-03-31 More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons--native only to a handful of islands in southeast Indonesia--have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, "The species may well indeed survive in the wild for generations to come while countless other organisms are lost."

**Communicating Process Architectures 2001** World Occam and Transputer User Group.

Technical Meeting 2001 Concurrency is an integral part of everyday life. The concept is so ingrained in our existence that we benefit from it without realizing. When faced with a taxing problem, we automatically involve others to solve it more easily. Such concurrent solutions to a complex problem may, however, not be quite straightforward and communication becomes crucial to ensure the successful solution of the problem.

*Prince2 Foundation Training Manual* Van Haren Publishing 2017-01-15 Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

**The Englor Affair** J.L. Langley 2020 Anxious to escape the confines of Regelence society, if only for a little while, Prince Payton Townsend poses as an admiral's aide to further investigate a dangerous conspiracy. Payton plans only to use his computer skills to help navigate the tangled web of mystery and deceit on planet Englor, then return home, but he finds himself drawn to the charismatic Colonel Simon Hollister. Simon, however, is no mere soldier--he is heir to the throne of Englor, and his life is meticulously planned to include a bride and heir. Unlike Regelence, the Regency society on Englor disapproves of same-sex relationships, and Payton and Simon's attraction plays out in a daring secret affair, one Simon never expected would grow into love. Risking scandal and certain ruin if they are discovered, Payton and Simon uncover more about a common enemy and a deadly plot that imperils both their worlds. But in this game of interplanetary intrigue, love might be the ultimate casualty....

**Engineering BGM** Alan Brace 2007-11-01 Also known as the Libor market model, the Brace-Gatarek-Musiela (BGM) model is becoming an industry standard for pricing interest rate derivatives. Written by one of its developers, *Engineering BGM* builds progressively from simple to more sophisticated versions of the BGM model, offering a range of methods that can be programmed into production code to suit readers' requirements. After introducing the standard lognormal flat BGM model, the book focuses on the shifted/displaced diffusion version. Using this version, the author develops basic ideas about construction, change of measure, correlation, calibration, simulation, timeslicing, pricing, delta hedging, barriers, callable exotics (Bermudans), and vega hedging. Subsequent chapters

address cross-economy BGM, the adaptation of the BGM model to inflation, a simple tractable stochastic volatility version of BGM, and Brazilian options suitable for BGM analysis. An appendix provides notation and an extensive array of formulae. The straightforward presentation of various BGM models in this handy book will help promote a robust, safe, and stable environment for calibrating, simulating, pricing, and hedging interest rate instruments.

**Developing Social Equity in Australian Adult Education** Pamela Osmond 2021-03-07 *Developing Social Equity in Australian Adult Education: Lessons from the Past* presents a case study of the trajectory of an Australian adult basic education program in New South Wales from its humanist, social justice beginnings, through forty years of destabilising change. It identifies the influences and influencers that have directed this change; those that were responsible for the creation of the field in its foundation years, and that were displaced by other, more powerful actors representing the global influence of the neoliberal ideology. The story is told largely through archival evidence and the voices of those practitioners who helped shape the discourse and practice of the foundation years, and who were required to respond to constantly changing policies and socio-economic contexts. It discusses some lessons that might be learnt from the past in order that a new set of actors might be mobilised to promote an alternate discourse. This book will appeal to students and scholars of social justice and adult education, and practitioners involved in adult education.
