[A Guide to Aging and Well-Being for Healthcare Professionals](#) Norman M. Brier 2020 This book provides practical evidence-based strategies that will help clinicians across a broad range of disciplines to address and discuss the main issues an aging person is likely to face and overcome if they are to maintain a sense of well-being as they age. Based on an extensive body of research, the relevant up-to-date knowledge for each topic is concisely presented, followed by practical, concrete, evidence-based suggestions

as to how a healthcare provider might acknowledge and create a partnership with their clients to help the person increase their sense of well-being. Each chapter contains a list of key terms, a summary, and case examples that illustrate in realistic and humanistic ways how a person might present the concern being addressed and intervene. The specific challenges associated with aging that are addressed include: anxiety attached to an increasing awareness of mortality; retirement; the increasing number of losses of significant others; regrets; memory loss; the arrival of old-old age and feelings of loneliness, mattering insufficiently, and a loss of purpose; and finally, dealing with imminent death. This book is suitable for all health professionals who provide clinical services or advice to older adults including physicians (i.e. particularly in the specialties of internal medicine, family medicine, geriatrics, and geriatric psychiatry), nurses, social workers, psychologists, physical therapists, occupational

therapists, and audiologists.

### **An Introduction to Architectural**

**Conservation** Nick Lee Evans 2019-07-25 There are over half a million listed buildings in Britain, conservation areas can be found in every borough, and a large proportion of our housing stock pre-dates 1914. So, whether in extending a listed house, reordering a local church, or converting an historic warehouse, most architects will work with historic buildings at some point in their career – even if they are not a specialist conservation architect. An Introduction to Architectural Conservation introduces non-specialist architects to the principles behind legislation concerning historic buildings. It will help them understand the practicalities of this legislation, the aims and objectives of Conservation Offices, Statutory Amenity Societies and other guardians of our heritage. With these skills, readers can advise clients more accurately, make successful listed building applications, and ensure their interventions are sensitive,

appropriate and effective. An Introduction to Architectural Conservation is also a practical guide to good working practice: taking readers through the process of preparing a listed building application, preparing a suitable tender package and administering the contract. .

Mexico City's Zócalo Benjamin Bross 2021-12-31 "This book presents a case study of one of Latin America's most important and symbolic spaces, the Zâocalo in Mexico City, weaving together historic events and corresponding morphological changes in the urban environment. It poses questions about how the identity of a place

emerges; how it evolves and, why does it change? Mexico City's Zâocalo: A History of a Constructed Spatial Identity utilizes the history of a specific place, the Zâocalo (Plaza de la Constituciâon), to explain the emergence and evolution of Mexican identities over time.

Starting from the Pre-Hispanic period to present day, the work illustrates how the Zâocalo reveals spatial manifestations as part of the larger socio-cultural zeitgeist. By focusing on the history of changes in spatial production -what Henri Lefebvre calls society's "secretions"- Bross traces how cultural, social, economic and political forces shaped the Zâocalo's spatial identity, and in turn, how the Zâocalo shaped and fostered new identities in return. It will be a fascinating read for architectural and urban historians investigating Latin America"--

*A Historical Guide to Edith Wharton* Carol J. Singley 2003-01-30 Edith Wharton, arguably the most important American female novelist, stands at a particular historical crossroads between

sentimental lady writer and modern professional author. Her ability to cope with this collision of Victorian and modern sensibilities makes her work especially interesting. Wharton also writes of American subjects at a time of great social and economic change--Darwinism, urbanization, capitalism, feminism, world war, and eugenics. She not only chronicles these changes in memorable detail, she sets them in perspective through her prodigious knowledge of history, philosophy, and religion. A Historical Guide to Edith Wharton provides scholarly and general readers with historical contexts that illuminate Wharton's life and writing in new, exciting ways. Essays in the volume expand our sense of Wharton as a novelist of manners and demonstrate her engagement with issues of her day.

**Creation of Their Past** Carolyn Higbie 2003  
Carolyn Higbie uses an inscription of the first century BC from Lindos to study the ancient Greeks and their past. The inscription contains two inventories. The first catalogues some forty objects given to Athena Lindia by figures from the mythological past (including Heracles, Helen, and Menelaus) and the historical past (including Alexander the Great and Hellenistic figures). The second catalogues three epiphanies of Athena Lindia to the townspeople when they were in need of her assistance. By drawing on anthropological approaches as well as archaeological and literary evidence, this book explores what was important to the Greeks about their past, how they reconstructed it, and how they made use of it in their present.

**Rhodes in the Hellenistic Age** Richard M.

Berthold 2018-10-18 This book offers a detailed political history of Rhodes from the foundation of the Rhodian republic in the fifth century B.C. to the conclusions of Rhodes' alliance with Rome in the second, a period in which Rhodes was a major Mediterranean power. Richard M. Berthold provides a complete account of Rhodian foreign affairs, exploring the principles and reasons behind Rhodes' foreign policy decisions. He traces Rhodes' history through the stormy years of the fourth century to the independence and prosperity of the third, arguing that Rhodes achieved economic and political success by pursuing a course of studied neutrality. Berthold maintains that Rhodes did not willfully abandon its neutral stance during the second century, but rather was forced by events to support Rome, a posture that ultimately led to Rhodes' loss of independence.
