

An Encyclopedia Of Claims Frauds And Hoaxes Of The Occult And Supernatural

Right here, we have countless book **An Encyclopedia Of Claims Frauds And Hoaxes Of The Occult And Supernatural** and collections to check out. We additionally meet the expense of variant types and plus type of the books to browse. The usual book, fiction, history, novel, scientific research, as with ease as various supplementary sorts of books are readily affable here.

As this An Encyclopedia Of Claims Frauds And Hoaxes Of The Occult And Supernatural, it ends going on visceral one of the favored ebook An Encyclopedia Of Claims Frauds And Hoaxes Of The Occult And Supernatural collections that we have. This is why you remain in the best website to look the unbelievable books to have.

The Big Con: Great Hoaxes, Frauds, Grifts, and Swindles in American History - Nate Hendley 2016-09-06

This book examines a broad range of infamous scams, cons, swindles, and hoaxes throughout American history—and considers why human gullibility continues in an age of easy access to information. • Explores figures such as "Yellow Kid" Weil, Charles Ponzi, Orson Welles, and Frank Abagnale, among others • Provides insight into human nature—gullibility being one aspect of it—throughout the ages, addresses the power of rumor and legend, and identifies the social conditions that have allowed some scams and hoaxes to flourish • Presents information that can serve academic research projects as well as fascinate and entertain general readers • Features the original stories behind the Hollywood movies *The Sting*, *Catch Me If You Can*, *Argo*, and *American Hustle*

Corrupted Science - John Grant 2018-05-01

A searing exposé of the misuses and misrepresentations of science from the time of Galileo continuing through to the present day, this new edition includes updates on the asbestos industry, the chemicals industry, the sugar industry, the agriculture industry (the abuse of antibiotics), and the automobile industry (lead in gasoline). The final chapter has been expanded to include the full-blooded assault on science mounted by the Trump administration.

Frauds, Myths, and Mysteries - Kenneth L. Feder 1996

The ancient rock art on the cover decorates the walks of Indian Creek Canyon in Newspaper Rock State Park, Utah, near Canyonlands National Park. What could its symbols and horned figures represent? Are they a Native American observer's depiction of space-suited extraterrestrials who once explored the American continent? Or do the images reflect the human imagination, blending human and animal elements into new mythical beings? Ken Feder addresses questions such as these in this entertaining and informative exploration of fascinating frauds and genuine mysteries. Through well-chosen examples, he demonstrates what is - and what is not - the scientific method; in the process, he clearly conveys why the veritable past is as exciting and intriguing as the fantasies concocted by the purveyors of pseudoscience. New to this Edition: 25% more illustrations, including side by side photographic comparisons in Chapter 6, 8, and 9; additional topics, including tabloid anthropology, the deconstructionist challenge to science, tracing the source of skeletal populations through mitochondrial DNA analysis, the so-called Mars face, the New Age use of Native American beliefs and Native Americans' reactions, the Ice Man, Chauvet Cave and our understanding of cave painting, and more.

The Faith Healers - James Randi 1987

Looks at the history of faith healers, describes tricks used to convince people of their paranormal abilities, and explains how many leading television evangelists victimize their

believers

A Treasury of Deception - Michael Farquhar
2005-05-31

We may say that honesty is the best policy, but history—to say nothing of business, politics, and the media—suggests otherwise. In this infinitely citable book, the author of two bestselling treasuries of scandal recounts some of the greatest deceptions of all time. With what forged document did the Vatican lay claim to much of Europe? Who wrote Hitler's diaries? Why do millions still believe the vague doggerel that Nostradamus passed off as prophecy?

Organizing his material by theme (con artists, the press, military trickery, scientific fraud, imposters, great escapes, and more), Michael Farquhar takes in everything from the hoodwinking of Hitler to Vincent "the Chin" Gigante's thirty-year crazy act. *A Treasury of Deception* is a zestful, gossipy exposé—and celebration—of mendacity. *A Treasury of Deception* also includes: Ten tricksters from scripture Ten great liars in literature Ten egregious examples of modern American doublespeak Ten classic deceptions from Greek mythology

Children of Lucifer - Ruben van Luijk 2016
Satanism adopts Satan, the Judeo-Christian representative of evil, as an object of veneration. This work explores the historical origins of this extraordinary 'antireligion.'

The Magic World of the Amazing Randi - James Randi 1989

Top magicians share a variety of magic tricks featuring cards, money, mentalism, numbers, dice, and string

The Truth about Uri Geller - James Randi 1982

A professional magician exposes mystics, mediums, psychic surgeons, and others who claim to possess supernatural or paranormal powers, demonstrating how their feats are little more than well-planned tricks that any competent magician can duplicate

Encyclopedia of Cyber Warfare - Paul J. Springer
2017-07-07

This definitive reference resource on cyber warfare covers all aspects of this headline topic, providing historical context of cyber warfare and an examination its rapid development into a potent technological weapon of the 21st century.

- Provides comprehensive coverage of the major individuals, organizations, impacts, and issues related to cyber warfare that enables readers to better understanding of the impact of cyber warfare on modern conflicts
- Includes a detailed chronology that documents the evolution and use of cyber warfare over the past few decades
- Supplies further readings and a lengthy bibliography that offer a wealth of options to students conducting extensive research on the subject

American Myths, Legends, and Tall Tales: An Encyclopedia of American Folklore [3 volumes] - Christopher R. Fee 2016-08-29

A fascinating survey of the entire history of tall tales, folklore, and mythology in the United States from earliest times to the present, including stories and myths from the modern era that have become an essential part of contemporary popular culture. • Presents a compelling mix of some 500 entries drawn from traditional Native American and European American culture as well as Mexican American, African American, Chinese American, and other national traditions • Includes numerous primary documents that help readers to pinpoint and understand the origins of different myths and legends as well as how they evolve over time • Features a wide variety of entries drawn from newer traditions of science fiction, urban legends, and conspiracy theories • Supplies bibliographic references with each entry that include websites for further reading and research

The Sexy Anime Drawing Book - Melody Love
2020-06-22

If you have been looking for a book that will help you learn how to draw color then you have found the right book. This book is amazing for kids and adults. It is the best way to have fun together and at the same time to learn about the easier ways to draw. Is it hard for you to get your child's attention to draw and color? Have you tried everything? Have you bought even expensive sets and still nothing? It is not about the type of colors and pencils he will use. It is about the simplicity of the lesson. It needs to be fun and at the same time easy to follow. That is why the drawings in this book are accepted and loved by many children in the world. Actually, adults love them too. Every single step is shown

for each drawing, even for the smallest one. But also many drawing use just simple shapes that when put together make wonderful art. Art skills are important for every child. It helps in shaping his imagination, helps with motor skills and coordination. It is fun too.

Flim-Flam! - James Randi 2022-09-15

Forty years after the original publication of James Randi's landmark book, *Flim-Flam!* remains a classic, with insights that are still relevant today - and perhaps even more so.

Psychic Blues - Mark Edward 2012-08-14

"Mark Edward is an equivocator, fibber, and mountebank. Which begs the question: if a liar admits to lying, can he be telling the truth? He is a literate, informative, intellectual, a student of the psychology of humans, a foe of those who would defraud the public for personal gain, and as an author and practicing psychic, he is first and foremost an entertainer."—Joel Moskowitz, International Brotherhood of Magicians Mark Edward admits that for years he exploited believers who wished to connect with supernatural ideas and sad family members who missed dead loved ones. Now Edward is a magician who works the Haunted Castle in Hollywood and is also on the editorial board of *Skeptic* magazine, where he reveals the means of psychic scamsters. This entertaining book is at once a confessional and instructional regarding human belief and those who exploit it. Though Edward believes that most practitioners of the psychic business are out-and-out scam artists, he also counters the skeptic belief that the supernatural is a lie. Both skeptic and skeptical of skepticism, Mark Edward has worked as a 900-number psychic, ghost hunter, and Hollywood Magic Castle medium. He has also worked vigorously to debunk psychic frauds and currently works on the editorial board of *Skeptic* magazine.

The "God" Part of the Brain - Matthew Alper 2008-09-01

Is Man the product of a God...or is "God" the product of human evolution? From the dawn of our species, every human culture-no matter how isolated-has believed in some form of a spiritual realm. According to author Matthew Alper, this is no mere coincidence but rather due to the fact that humans, as a species, are genetically predisposed to believe in the universal concepts

of a god, a soul and an afterlife. This instinct to believe is the result of an evolutionary adaptation-a coping mechanism-that emerged in our species to help us survive our unique and otherwise debilitating awareness of death. Spiritual seekers and atheists alike will be compelled and transformed by Matthew Alper's classic study of science and religion. The 'God' Part of the Brain has gained critical acclaim from some of the world's leading scientists, secular humanists, and theologians, and is as a must read for anyone who has pondered the question of God's existence, as well as the meaning of our own. Praise for *The "God" Part of the Brain* "This cult classic in many ways parallels Rene Descartes' search for reliable and certain knowledge...Drawing on such disciplines as philosophy, psychology, and biology, Alper argues that belief in a spiritual realm is an evolutionary coping method that developed to help humankind deal with the fear of death...Highly recommended."— Library Journal "I very much enjoyed the account of your spiritual journey and believe it would make excellent reading for every college student - the resultant residence-hall debates would be the best part of their education. It often occurs to me that if, against all odds, there is a judgmental God and heaven, it will come to pass that when the pearly gates open, those who had the valor to think for themselves will be escorted to the head of the line, garlanded, and given their own personal audience." — Edward O. Wilson, two-time Pulitzer Prize-Winner "This is an essential book for those in search of a scientific understanding of man's spiritual nature. Matthew Alper navigates the reader through a labyrinth of intriguing questions and then offers undoubtedly clear answers that lead to a better understanding of our objective reality." — Elena Rusyn, MD, PhD; Gray Laboratory; Harvard Medical School "What a wonderful book you have written. It was not only brilliant and provocative but also revolutionary in its approach to spirituality as an inherited trait."— Arnold Sadwin, MD, former chief of Neuropsychiatry at the University of Pennsylvania "A lively manifesto...For the discipline's specific application to the matter at hand, I've seen nothing that matches the fury of *The 'God' Part of the Brain*, which perhaps

explains why it's earned something of a cult following." — Salon.com "All 6 billion plus inhabitants of Earth should be in possession of this book. Alper's tome should be placed in the sacred writings' section of libraries, bookstores, and dwellings throughout the world. Matthew Alper is the new Galileo...Immensely important...Defines in a clear and concise manner what each of us already knew but were afraid to admit and exclaim."— John Scoggins, PhD "Vibrant ... vivacious. An entertaining and provocative introduction to speculations concerning the neural basis of spirituality."— Free Inquiry Magazine

Houdini, His Life and Art - James Randi 1976

Discusses the life of master magician Harry Houdini, his magic and escapes, and the times in which he lived.

The Third Eye - Tuesday Lobsang Rampa 2019

The story of Tibet at the turn of the century as seen through the eyes of a boy. T. Lobsang Rampa was preordained to be a Tibetan priest, a sign from the stars that could not be ignored. When he left his wealthy home to enter the monastery, his heart was filled with trepidation, with only a slight knowledge of the rigorous spiritual training and physical ordeal that awaited him...This is his story, a hauntingly beautiful and deeply inspiring journey of awakening within Chakpori Lamasery, the temple of Tibetan medicine. It is a moving tale of passage through the mystic arts of astral projection, crystal gazing, aura deciphering, meditation, and more, a spiritual guide of enlightenment and discovery through the opening of the all-powerful, the all-knowing...

Hoax - Edward Steers 2013-04-01

Did a collector with a knack for making sensational discoveries really find the first document ever printed in America? Did Adolf Hitler actually pen a revealing multivolume set of diaries? Has Jesus of Nazareth's burial cloth survived the ages? Can the shocking true account of Abraham Lincoln's assassination be found in lost pages from his murderer's diary? Napoleon famously observed that "history is a set of lies agreed upon," and Edward Steers Jr. investigates six of the most amazing frauds ever to gain wide acceptance in this engrossing book. Hoax examines the legitimacy of the Shroud of Turin, perhaps the most hotly debated relic in all

of Christianity, and the fossils purported to confirm humanity's "missing link," the Piltdown Man. Steers also discusses two remarkable forgeries, the Hitler diaries and the "Oath of a Freeman," and famous conspiracy theories alleging that Franklin D. Roosevelt had prior knowledge of the planned attack on Pearl Harbor and that the details of Lincoln's assassination are recorded in missing pages from John Wilkes Booth's journal. The controversies that Steers presents show that there are two major factors involved in the success of a hoax or forgery -- greed and the desire to believe. Though all of the counterfeits and conspiracies featured in Hoax have been scientifically debunked, some remain fixed in many people's minds as truth. As Steers points out, the success of these frauds highlights a disturbing fact: If true history fails to entertain the public, it is likely to be ignored or forgotten.

Bad Astronomy - Philip C. Plait 2002-10-08

Advance praise for Philip Plait's *Bad Astronomy* "Bad Astronomy is just plain good! Philip Plait clears up every misconception on astronomy and space you never knew you suffered from." -- Stephen Maran, Author of *Astronomy for Dummies* and editor of *The Astronomy and Astrophysics Encyclopedia* "Thank the cosmos for the bundle of star stuff named Philip Plait, who is the world's leading consumer advocate for quality science in space and on Earth. This important contribution to science will rest firmly on my reference library shelf, ready for easy access the next time an astrologer calls." --Dr. Michael Shermer, Publisher of *Skeptical Magazine*, monthly columnist for *Scientific American*, and author of *The Borderlands of Science* "Philip Plait has given us a readable, erudite, informative, useful, and entertaining book. *Bad Astronomy* is Good Science. Very good science..." --James "The Amazing" Randi, President, James Randi Educational Foundation, and author of *An Encyclopedia of Claims, Frauds, and Hoaxes of the Occult and Supernatural* "Bad Astronomy is a fun read. Plait is wonderfully witty and educational as he debunks the myths, legends, and 'conspiracies' that abound in our society. 'The Truth Is Out There' and it's in this book. I loved it!" --Mike Mullane, Space Shuttle astronaut and author of *Do Your Ears Pop in*

Space?

The Encyclopedia of Misinformation - Rex Sorgatz 2018-03-27

"In an era of 'alternative facts,' Rex Sorgatz's *The Encyclopedia of Misinformation* helps put things in perspective." —Fast Company This compendium of misinformation, deception, and self-delusion throughout history examines fakery in the context of science and advertising, humor and law, sports and video games, and beyond. Entries span eclectic topics: Artificial Intelligence, Auto-Tune, Chilean Sea Bass, Clickbait, Cognitive Dissonance, Cryptids, False Flag Operations, Gaslighting, Gerrymandering, Kayfabe, Laugh Tracks, Milli Vanilli, P.T. Barnum, Photoshopping, Potemkin Villages, Ponzi Schemes, Rachel Dolezal, Strategy, Truthiness, and the Uncanny Valley. From A to Z, this is the definitive guide to how we are tricked, and how we trick ourselves. "Occasional salty language and pop-culture references make this compendium of 300 short entries a delightful mix of high- and lowbrow." —Booklist

Conjuring - James Randi 1993-10-15
Provides the history of magic and discusses the exploits of some of the world's most notorious magicians

Test Your ESP Potential - James Randi 1982

The Truth about Uri Geller - James Randi 1982

There is more to Uri Geller than his countless "miracles" - and James (The Amazing) Randi tells all in this fascinating examination of the Geller myth. - What really makes Geller run? - Why have scientists reported on all Geller's "successful" psychic tests and ignored his many failures? - Why will Uri perform almost anywhere, anytime, except in front of professional magicians? - Can Geller actually bend spoons, keys and nails with his "psychic" powers? - Why do people around the world continue to believe Geller has magic powers, when his tricks have been exposed many times? In an eye-opening exposé, Randi provides a devastating blow to Geller and the pseudoscience of parapsychology.

The Mask of Nostradamus - James Randi 1993
A comprehensive critical biography of the legendary sixteenth-century astrologer examines the allure of the man and his ideas and clarifies

his many famous predictions, such as Hitler's reign of terror and Watergate

Flim Flam! - James Randi 1980-01-01

The Encyclopedia of the Paranormal - Gordon Stein 1996

Articles deal with parapsychology, the Bermuda Triangle, near-death experiences, ghost, haunted houses, and more

The Big Book of Hoaxes - Carl Sifakis 1996

Provides comic strip profiles and stories of hoaxes, including media hoaxes, scientific hoaxes, imposters, pranksters, and scams.

The Skeptic's Dictionary - Robert Carroll 2004-04-28

A wealth of evidence for doubters and disbelievers "Whether it's the latest shark cartilage scam, or some new 'repressed memory' idiocy that besets you, I suggest you carry a copy of this dictionary at all times, or at least have it within reach as first aid for psychic attacks. We need all the help we can get." -James Randi, President, James Randi Educational Foundation, randi.org "From alternative medicine, aliens, and psychics to the farthest shores of science and beyond, Robert Carroll presents a fascinating look at some of humanity's most strange and wonderful ideas. Refreshing and witty, both believers and unbelievers will find this compendium complete and captivating. Buy this book and feed your head!" -Clifford Pickover, author of *The Stars of Heaven* and *Dreaming the Future* "A refreshing compendium of clear thinking, a welcome and potent antidote to the reams of books on the supernatural and pseudoscientific." -John Allen Paulos, author of *Innumeracy* and *A Mathematician Reads the Newspaper* "This book covers an amazing range of topics and can protect many people from being scammed." - Stephen Barrett, M.D., quackwatch.org Featuring close to 400 definitions, arguments, and essays on topics ranging from acupuncture to zombies, *The Skeptic's Dictionary* is a lively, commonsense trove of detailed information on all things supernatural, occult, paranormal, and pseudoscientific. It covers such categories as alternative medicine; cryptozoology; extraterrestrials and UFOs; frauds and hoaxes; junk science; logic and perception; New Age energy; and the psychic. For the open-minded

seeker, the soft or hardened skeptic, and the believing doubter, this book offers a remarkable range of information that puts to the test the best arguments of true believers.

The Ghost of Greenwich Village - Lorna Graham 2011-06-28

In this charming fiction debut, a young woman moves to Manhattan in search of romance and excitement—only to find that her apartment is haunted by the ghost of a cantankerous Beat Generation writer in need of a rather huge favor. For Eve Weldon, moving to Greenwich Village is a dream come true. She's following in the bohemian footsteps of her mother, who lived there during the early sixties among a lively community of Beat artists and writers. But when Eve arrives, the only scribe she meets is a grumpy ghost named Donald, and the only writing she manages to do is for chirpy segments on a morning news program, *Smell the Coffee*. The hypercompetitive network environment is a far cry from the genial camaraderie of her mother's literary scene, and Eve begins to wonder if the world she sought has faded from existence. But as she struggles to balance her new job, demands from Donald to help him complete his life's work, a budding friendship with a legendary fashion designer, and a search for clues to her mother's past, Eve begins to realize that community comes in many forms—and that the true magic of the Village is very much alive, though it may reveal itself in surprising ways.

Encyclopedia of Claims, Frauds, and Hoaxes - James Randi 1997-03-15

Covers illusions, psychics, mystics, clairvoyants, and frauds

The End and the Beginning - Hermynia Zur Mühlen 2010

First published in Germany in 1929, *The End and the Beginning* is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Mühlen spent much of her childhood travelling in Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a

professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Mühlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

Encyclopedia of Sacred Theology - Abraham Kuyper 1898

An Encyclopedia of Claims, Frauds, and Hoaxes of the Occult and Supernatural - James Randi 1995

An Encyclopedia of Claims, Frauds, and Hoaxes of the Occult and Supernatural - James Randi 1995

Six hundred and sixty-six entries, along with hundreds of illustrations, on such topics as the Abominable Snowman, astrologer Jeane Dixon, and the monster of Loch Ness expose the cranks, charlatans, and myths of past and present.

Conspiracies and Conspiracy Theories in American History [2 volumes] - Christopher R. Fee 2019-05-31

This up-to-date introduction to the complex world of conspiracies and conspiracy theories provides insight into why millions of people are so ready to believe the worst about our political, legal, religious, and financial institutions. • Provides an in-depth, easy-to-access account of conspirators and secret organizations behind key plots to control American legal, political, and financial systems • Presents the history of key American conspiracy theories, taking a longer view of how current conspiracy thinking developed over generations • Explains the similarities and differences among conspiracy theories held by people on the far right and far left of the political spectrum • Explores the

cultural significance of widespread, popular reactions to advances in science, technology, and medicine, as well as the public's skepticism about highly trained professionals and their expert knowledge • Offers an up-to-date survey of popular conspiracy theories regarding celebrity deaths and the popular distrust of the American media and police investigations • Details the importance of the internet and social media in organizing conspiratorial movements and spreading conspiracy theories

An Encyclopedia of Claims, Frauds, and Hoaxes of the Occult and Supernatural -

James Randi 1995

An encyclopedia of the occult and supernatural, covering such topics as astrology, the Bermuda Triangle, crystal power, the Shaman, and tarot cards.

Shapes in Math, Science and Nature -

Catherine Sheldrick Ross 2014-04-01

The three most basic shapes -- squares, triangles and circles -- are all around us, from the natural world to the one we've engineered. Full of fascinating facts about these shapes and their 3D counterparts, *Shapes in Math, Science and Nature* introduces young readers to the basics of geometry and reveals its applications at home, school and everywhere in between. Puzzles and activities add to the fun factor.

Hoax: A History of Deception - Ian Tattersall 2018-03-20

An entertaining collection of the most audacious and underhanded deceptions in the history of mankind, from sacred relics to financial schemes to fake art, music, and identities. World history is littered with tall tales and those who have fallen for them. Ian Tattersall, a curator emeritus at the American Museum of Natural History, has teamed up with Peter Névraumont to tell this anti-history of the world, in which Michelangelo fakes a masterpiece; Arctic explorers seek an entrance into a hollow Earth; a Shakespeare tragedy is "rediscovered"; a financial scheme inspires Charles Ponzi; a spirit photographer snaps Abraham Lincoln's ghost; people can survive ingesting only air and sunshine; Edgar Allen Poe is the forefather of fake news; and the first human was not only British but played cricket. Told chronologically, *HOAX* begins with the first documented announcement of the end of the world in 2800

BC and winds its way through controversial tales such as the Loch Ness Monster and the Shroud of Turin, past proven fakes such as the Thomas Jefferson's ancient wine and the Davenport Tablets built by a lost race, and explores bald-faced lies in the worlds of art, science, literature, journalism, and finance.

Fakers - H. P. Wood 2018-10-02

From the Trojan horse to fake news, scams have run rampant throughout history and across the globe. Some con artists do it for fun, others for profit. . . and every once in a while, a faker saves the world. In this era of daily online hoaxes, it's easy to be caught off-guard. *Fakers* arms kids with information, introducing them to the funniest, weirdest, and most influential cons and scams in human history. Profiles of con artists will get readers thinking about motivation and consequence, and practical tips will help protect them from falsehoods. If it sounds too good to be true, it probably is--except in the case of this book!

Why People Believe Weird Things - Michael Shermer 2002-09-01

Revised and Expanded Edition. In this age of supposed scientific enlightenment, many people still believe in mind reading, past-life regression theory, New Age hokum, and alien abduction. A no-holds-barred assault on popular superstitions and prejudices, with more than 80,000 copies in print, *Why People Believe Weird Things* debunks these nonsensical claims and explores the very human reasons people find otherworldly phenomena, conspiracy theories, and cults so appealing. In an entirely new chapter, "Why Smart People Believe in Weird Things," Michael Shermer takes on science luminaries like physicist Frank Tipler and others, who hide their spiritual beliefs behind the trappings of science. Shermer, science historian and true crusader, also reveals the more dangerous side of such illogical thinking, including Holocaust denial, the recovered-memory movement, the satanic ritual abuse scare, and other modern crazes. *Why People Believe Strange Things* is an eye-opening resource for the most gullible among us and those who want to protect them.

The Bigfoot Book - Nick Redfern 2015-08-17

Does a hulking, hairy, 800-pound, nine-foot-tall, elusive primate roam the woods and forests throughout North America—and the world?

What should we make of the grainy videos and photos and the thousands of eyewitness reports? Audio-recordings exist purporting to be the creatures' eerie chatter and bone-chilling screaming. Whether called Sasquatch, Yeti, Bigfoot, or something else, bipedal primates appear in folklore, legends, and eyewitness accounts in every state of the union and many places around the world. The fascination with the man-beast is stronger than ever in today's pop culture. Exploring the history, movies, and literature, the conspiracy theorizing, and the world of the supernatural, *The Encyclopedia of Sasquatch, Yeti and Cryptid Primates* is a comprehensive resource to the man-beast. With nearly 200 entries and 120 photographs, drawings, and illustrations, it is the definitive guide to understanding, hunting, and avoiding the brute, as well as discovering the facts behind

the sightings and horrifying tales. It covers 400 years of folklore, mythology, history, and pop culture, including Native American lore, the "wild men" reports in the pages of 19th century-era American newspapers, Florida's Myakka Skunk Ape, Australia's Yowie, China's Yeren, Himalayas' Yeti, Russian expeditions, Harry and the Hendersons, *Exists* and the countless movies titled Bigfoot, as well as specials on the television shows Animal Planet, Discovery Channel and National Geographic Channel, scientific reports and findings, and much, much more. Various documentaries and reality television shows have all superficially tackled the subject, but Nick Redfern presents a truly encyclopedic look at cryptid primates. It is a richly researched reference, overflowing with fascinating information to make readers think—and reconsider their next camping trip.
