Around the World on a Motorcycle Zoltan Sulkowsky 2013-09-01 The year was 1928 when two young Hungarians decided to travel around the world on a Harley-Davidson motorcycle with sidecar. Like Robert Fulton, whose circumnavigation of the globe is chronicled in his popular 1937 book *One Man Caravan*, Sulkowsky thought his was the first around-the-world journey on a motorcycle. This account of his trip with friend Gyula Bartha gives a very clear-eyed view of the world in the 1930s -- a world where the colonizing influence of Europe had affected much of Africa and Asia but not all. The two experienced the riches of sultans, witnessed remote cultures and extreme poverty in far-flung villages, travelled through wilderness with the ever-present danger of wild animals, and traversed roads of all descriptions. They dealt with mud, sand, extreme heat and cold, and rivers where the motorcycle had to be taken apart to cross in a small boat. This intelligent and engaging book, now in a paperback edition, offers a unique world view between the World Wars, flavored by the great diversity of cultures and the wide variety of human life that exists on the planet.

More Than Asphalt, Concrete, and Steel 1997 The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) encourages the mainstreaming of environmental, cultural, and social considerations in every aspect of transportation planning and development. ISTEA has paved the way for non-traditional projects by creating "flexible funding". This unprecedented tool enables state and local decision makers to look beyond traditional highway and transit agendas. It empowers them to spend highway dollars on "the most appropriate" transportation solutions for their needs. They have chosen transportation activities ranging from renovating an historic bridge to realigning a main street to redesigning an entire transportation system. This booklet presents some of their exemplary environmental projects and processes.

Successful Response Starts with a Map National Research Council 2007-01-19 In the past few years the United States has experienced a series of disasters, such as Hurricane Katrina in 2005, which have severely taxed and in many cases overwhelmed responding agencies. In all aspects of emergency management, geospatial data and tools have the potential to help save lives, limit damage, and reduce the costs of dealing with emergencies. Great strides have been made in the past four decades in the development of geospatial data and tools that describe locations of objects on the Earth's surface and make it possible for anyone with access to the Internet to witness the magnitude of a disaster. However, the effectiveness of any technology is as much about the human systems in which it is embedded as about the technology itself. *Successful Response Starts with a Map* assesses the status of the use of geospatial data, tools, and infrastructure in disaster management, and recommends ways to increase and improve their use. This book explores

emergency planning and response; how geospatial data and tools are currently being used in this field; the current policies that govern their use; various issues related to data accessibility and security; training; and funding. Successful Response Starts with a Map recommends significant investments be made in training of personnel, coordination among agencies, sharing of data and tools, planning and preparedness, and the tools themselves.

Street Addressing and the Management of Cities Catherine Farvacque-Vitkovi? 2005 There has been a dramatic demographic shift from rural areas to cities in sub-Saharan African countries over the last few decades. This continuing urbanisation trend has created new challenges for local governments in terms of managing urban services, since over half of the city streets in these countries have no names or addresses, and the problem is particularly acute in the poorest neighbourhoods. This publication examines the use of street addressing initiatives to address this problem, giving information on current and future applications, considering examples of use in many African countries, and setting out a methodological guide for implementing such initiatives.

Consumer redress for misleading and aggressive practices Great Britain: Law Commission 2012-03-28 This joint report by the Law Commission and Scottish Law Commission considers the redress available to consumers who have been the victims of misleading or aggressive practices by traders. Currently consumers have to rely on private law rights if they want to take action. The Commissions' review found current private law in this area to be fragmented, complex and unclear, and recommends new legislation to provide redress to consumers who experience misleading and aggressive practices in their dealings with traders. The aim is to clarify and simplify the current law on misleading practices, and to improve the law on aggressive practices by filling the gaps in the current law. Limited reform, targeting the most serious causes of consumer detriment, is proposed. The report follows the Consumer Protection from Unfair Trading Regulations 2008 in most, but not all, respects. Recommendations are made on liability and remedies. Consumers would have the right to unwind the transaction (get a refund), or receive a discount on the price. Additional damages may be recoverable to compensate for additional loss. The report also considers the specific area of unfair payment collection.

Showing Up Ray Arata 2022-01-04 "More people recognize the importance of Allyship—and that's great. Unfortunately, many men still don't know what they need to do to effect change so everyone feels valued and empowered at work. In Showing Up, Ray Arata provides clear guidance on how to turn good intentions into action. I strongly recommend it to everyone interested in helping create a more equal and productive workplace." —Sheryl Sandberg, COO of Facebook and founder of LeanIn.Org and OptionB.Org Showing Up is a revolutionary step-by-step guide—by and for men—to end toxic masculinity and enact heart-based leadership, increase diversity, bolster the bottom line, and create a workplace culture where everyone wins. The Time's Up, Me Too, and Black Lives Matter movements have sounded a wake-up—especially for men. Organizations worldwide now realize the critical importance of diversity, equity, and inclusion (DEI) for underrepresented people. It's abundantly clear: the default model of masculinity isn't working for anyone. But for a new and healthier infrastructure, for permanent and transformational shifts, we need a plan that includes men. In Showing Up, Ray Arata details the proven methods he's shared with such companies as Verizon, Bloomberg, Moody's, Intel, Toyota, Hearst, and more, teaching men to • Embrace healthy masculinity as a cornerstone of inclusionary leadership; • Identify unhealthy masculine behaviors in the workplace—like mansplaining, maninterrupting, and manopolizing; • Adopt behavior modifications aligned with being an inclusive leader and ally; • Incorporate specific language to use in healthy discussions; and • Leverage power and position to elevate underrepresented groups.

Scars, Marks & Tattoos Jacqueline Caruso 2021-03-31 I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.
