European VAT and the Sharing Economy
Giorgio Beretta 2019-10-24 A breadth of new digital platforms has dramatically expanded the range of possibilities for exchanging anything

required by business or personal needs from accommodation to rides. In the virtual marketplaces shaped and ruled by these novel matchmakers, rather than by a single centralized entity, value is created through the

granular interaction of many dispersed individuals. By allowing instantaneous and smooth interaction among millions of individuals, platforms have indeed pushed the digital frontier farther and farther, so as to include within it even services once not capable of direct delivery from a remote location such as accommodation and passenger transport. Legal disruption is also underway with foundational dichotomous categories, such as those between suppliers and customers, business and private spheres, employees and self-employed, no longer viable as organizational legal structures. This is the essential background of the first book to relate what is synthetically captured under the umbrella definition of 'sharing economy' to key features at the core of European Value Added Tax (EU VAT) and to look at the feasibility of a reformed EU VAT system capable of addressing the main

challenges posed by these new models of production, distribution and consumption of goods and services. Specifically, the study analyses five legal propositions underpinning the current EU VAT system as the following: taxable persons; taxable transactions; composite supplies; place of supply rules; and liability regimes for collection and remittance of VAT. Exploration of these five legal propositions is meant to assess the practical feasibility of shoehorning the main sharing economy business models - notably, those available in the accommodation and passenger transport sectors - into the framework of existing EU VAT provisions. The author further draws on the normative standards of equality, neutrality, simplicity, flexibility and proportionality to test the 'reflexes' of the current EU VAT system in the sharing economy domain. Opportunities for reform of the current EU VAT system are in turn

evaluated with each chapter including cogent proposals in the form of incremental and targeted amendments to the current EU VAT provisions. As the first comprehensive analysis of the treatment of the sharing economy for VAT purposes, the book provides not only a theoretical framework for future studies in the tax field but also indispensable practical guidance for VAT specialists confronting daily with the many challenges ushered in by the sharing economy. Moreover, the various solutions and recommendations advanced in the book offer valuable insights to international and national policymakers dealing with similar issues under other VAT systems.

Green metamorphoses: agriculture, food, ecology B. Torquati 2020-10-14 This book offers a wide selection of contributions presented at the LV Conference of Italian society of agricultural economics (SIDEA) Studies. Agricultural economists and sociologists reflect on the change processes that are affecting the agri-food systems and take a small step towards an improved understanding of the complexity of green metamorphosis, and the interplay between agriculture, food and ecology. The key message is that a green metamorphosis has been taking

place, increasingly involving more and more aspects and dimensions: from environment to consumers' preferences, from social value to human health, from profitability to governance issues. Furthermore, this book tries to shed a light on the complexity of the new agricultural paradigm, which involves technology as well as traditions, trying to understand the ongoing metamorphosis taking into account that 'nothing is created, nothing is destroyed, everything is transformed'. This volume intends to guide the new generations of agricultural economists, who have the hard task of leading the green metamorphosis across the four main axes of sustainability: economic, socio-cultural, environmental, and political.

Essentials of Development Economics, Third Edition J. Edward Taylor 2020
"Written to provide students with the critical tools used in today's development economics research and

practice, Essentials of Development Economics represents an alternative approach to traditional textbooks on the subject. Compact and less expensive than other textbooks for undergraduate development economics courses, Essentials of Development Economics offers a broad overview of key topics and methods in the field. Its fourteen easy-to-read chapters introduce cutting-edge research and present best practices and state-of-the-art methods. Most development texts are written around topics: money, labor, population, and so on. The chapters in this book are less about topics than about providing a window into how developing economies are different and how this shapes the way we study them. Most of the cutting-edge research by economists is found in journal articles that are beyond the reach of most undergraduate students. Sidebars scattered throughout the book try to make important research in

influential articles accessible, summarizing the questions they ask, the methods they use, key findings, and why they are important. By mastering the material in this book, students will have the conceptual grounding needed to move on to higher-level development economics courses"--

Macroeconomics in Context Neva Goodwin 2015-03-12
Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, *Microeconomics in Context*, the book is attuned to economic realities--and it has a bargain price. The in *Context* books offer affordability, engaging treatment of high-interest

topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical,

institutional, social, political, and ethical--and always with reference to human well-being.
