**Mechanization for Rural Development** - Josef Kienzle  
2013

This publication gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable

crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices. This requires specific mechanization measures to allow crops to be established with minimum soil disturbance, to allow the soil to be protected under organic cover for as long as possible,

and to establish crop rotations and associations to feed the soil and to exploit crop nutrients from various soil horizons. This work is the starting point to help the reader understand the complexities and requirements of the task ahead.

**The Spy Who Would Be Tsar**

- Kevin Coogan 2021-08-16

Michal Goleniewski was one of  
the Cold War's most important  
spies but has been overlooked  
in the vast literature on the  
intelligence battles between  
the Western Powers and the  
Soviet Bloc. Renowned  
investigative journalist Kevin  
Coogan reveals Goleniewski's  
extraordinary story for the first  
time in this biography.

Goleniewski rose to be a senior  
officer in the Polish  
intelligence service, a position  
which gave him access to both  
Polish and Russian secrets.  
Disillusioned with the Soviet  
Bloc, he made contact with the  
CIA, sending them letters  
containing significant  
intelligence. He then decided

to defect and fled to America in 1961 via an elaborate escape plan in Berlin. His revelations led to the exposure of several important Soviet spies in the West including the Portland spy ring in the UK, the MI6 traitor George Blake, and a spy high up in the West German intelligence service. Despite these hugely important contributions to the Cold War, Goleniewski would later be abandoned by the CIA after he made the outrageous claim that he was actually Tsarevich Alexei Nikolaevich of Russia - the last remaining member of the Romanov Russian royal family and therefore entitled to the lost treasures of the Tsar. Goleniewski's increasingly fantastical claims led to him becoming embroiled in a bizarre demi-monde of Russian exiles, anti-communist fanatics, right-wing extremists and chivalric orders with deep historical roots in America's racist and antisemitic underground. This fascinating and revelatory biography will be of interest to students and researchers of the Cold War,

intelligence history and right-wing extremism as well as general readers with an interest in these intriguing subjects.

[Farm Tractor Systems](#) - Segun R. Bello 2012-11-30

A link between machine functionality, operations, performance and decision making in the management of power sources and field operations were presented in this book. Depreciation and functional deviation of a machine from its original state at manufacture could put the life of a machine in danger of breakdown or obsolescence, which is counted a loss to any such organization or the

entrepreneur. To avoid such losses, an understanding of machine systems functionality and a well organized maintenance programme designed to maintain, prevent or restore machine to near original state is required. Vocational training and entrepreneurship education in Nigeria's tertiary institutions

has made possible a do-it-yourself skill acquisition in machine fault tracking, maintenance and repairs. A bimodal training programme packaged and presented in this book is all that is required for managerial decision making, maintenance and qualitative service delivery.
