The Hidden Gulag - David R. Hawk 2012-04-10

The second edition of Hidden Gulag utilizes the testimony of sixty former North Koreans who were severely and arbitrarily deprived of their liberty in a vast network of penal and forced labor institutions in the Democratic People's Republic of Korea (DPRK or North Korea) for reasons not permitted by international law. By the time of the research for the second edition in 2010 and 2011, there were some 23,000 former North Koreans who recently arrived in South Korea. Included in this number are hundreds of persons formerly detained in the variety of North Korea's slave labor camps, penitentiaries, and detention facilities. Included in this number are several former prisoners who were arbitrarily imprisoned for twenty to thirty years before their escape or release from the labor camps, and their subsequent flight through China to South Korea. This newly available testimony dramatically increases our knowledge of the operation of North Korea's political prison and labor camp system. This second edition of Hidden Gulag also utilizes a recent international legal framework for the analysis of North Korea's human rights violations: the norms and standards established in the Rome Statute of the International Criminal Court for defining and determining crimes against humanity, which became operative in July 2002. In addition to the testimony and accounts from the former political prisoners in this report, this second edition of Hidden Gulag also includes satellite photographs of the prison camps.

Affective Health and Masculinities in South Africa - Hans Reihling 2020-04-24

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is

conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Extraction Empire - Pierre Belanger 2018-07-31

How Canada became an empire in its own right and how Canadian life came to be mediated through mineral extraction. Extraction is the process and practice that defines Canada, at home and abroad. Of the nearly 20,000 mining projects in the world from Africa to Latin America, more than half are Canadian operated. Not only does the mining economy employ close to 400,000 people in Canada, it contributed \$57 billion CAD to Canada's GDP in 2014 alone. Globally, more than 75 percent of the world's mining firms are based in Canada. The scale of these statistics naturally extends the logic of Canada's historical legacy as state, nation, and now as global resource empire. Canada, once a far-flung northern outpost of the British Empire, has become an empire in its own right. This book examines both the historic and contemporary Canadian culture of extraction, with essays, interviews, archival material, and multimedia visualizations. The essayists and interviewees—who include such prominent figures as Naomi Klein and Michael Ignatieff—come from a range of fields, including geography, art, literature, architecture, science, environment, and business. All consider how Canadian life came to be mediated through mineral extraction. When did this empire emerge? How far does it reach? Who gains, who loses? What alternatives exist? On the 150th anniversary of the creation of Canada by Queen Victoria's Declaration of Confederation, it is time for Canada to reexamine and reimagine its imperial role throughout the world, from coast to coast, from one continent to another. **Tom Kundig: Houses** - Dung Ngo 2006-11-09

"Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of Tom Kundig: Houses, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined--disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --
