The Brain That Changes Itself - Norman Doidge 2007-03-15
"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've

transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

The Diabetes Code - Dr. Jason Fung 2018-04-03

From acclaimed author Dr. Jason Fung, a revolutionary guide to reversing diabetes. Dr. Jason Fung forever changed the way we think

about obesity with his best-selling book, *The Obesity Code*. Now he has set out to do the same for type 2 diabetes. Today, most doctors, dietitians, and even diabetes specialists consider type 2 diabetes to be a chronic and progressive disease—a life sentence with no possibility of parole. But the truth, as Dr. Fung reveals in this paradigm-shifting book, is that type 2 diabetes is reversible. Writing with clear, persuasive language, he explains why conventional treatments that rely on insulin or other blood-glucose-lowering drugs can actually exacerbate the problem, leading to significant weight gain and even heart disease. The only way to treat type 2 diabetes effectively, he argues, is proper dieting and intermittent fasting—not medication. The New Rules of Lifting for Women - Lou Schuler 2008-12-26
In *The New Rules of Lifting for Women*, authors Lou Schuler, Cassandra Forsythe and Alwyn Cosgrove present a comprehensive strength, conditioning and nutrition plan destined to revolutionize the way women work out. All the latest studies prove that strength training, not aerobics, provides the key to losing fat and building a fit, strong body. This book refutes the misconception that women will “bulk up” if they lift heavy weights. Nonsense! It's tough enough for men to pack on muscle, and they have much more of the hormone necessary to build muscle: natural testosterone. Muscles need to be strengthened to achieve a lean, healthy look. Properly conditioned muscles increase metabolism and promote weight loss -- it's that simple. The program demands that women put down the “Barbie” weights, step away from the treadmill and begin a strength and conditioning regime for the natural athlete in every woman. *The New Rules of Lifting for Women* will change the way women see fitness, nutrition and their own bodies.

- How antiaging medicine can help detox the body of harmful pollutants and chemicals and strengthen our weakest glands and organs
- The dangers of perimenopause and how women can treat it
- Why so many hysterectomies are unnecessary, how birth control pills may have contributed to the rise of hysterectomies, and how to restore your body to perfect hormonal balance after having one
- How andropause is a real condition for men, and how men can lose weight, regain their youthful physiques, and restore health, energy, and sexuality, all through bioidentical HRT
- The importance of sleep and the healing work that nature does during this time to balance hormones and increase energy

In this "antiaging bible," Suzanne brings together prominent, Western-trained antiaging doctors to show how the

traditional medical approach is woefully inadequate. Its standard of care has been to treat all symptoms with drugs, but in *Ageless* you will find out how this approach does not make us better. With antiaging medicine you can heal your body rather than keep a chronic condition at bay with drugs. *Ageless* shows you how to keep your "insides" young, and how this manifests on the outside.

The New Bodybuilding for Old School Results - Ellington Darden
2006-01-01

The *New Bodybuilding for Old-School Results* By Ellington Darden, Ph.D. Muscle magazines, which feature distorted bodies and exaggerated parts, are missing the mark with their audience. The majority of readers are tired of seeing these cartoon characters and their fictional training. Discontent is rampant throughout the bodybuilding world. Most trainees don't want that bloated, drug-induced look of a modern pro bodybuilder. They'd much rather have that chiseled, athletic look of the old-school Mr. Americas such as Steve Reeves, Boyer Coe, and Casey Viator. These men possessed size and symmetry, as well as strength and muscularity. Just as important, men of the old school passed down their training strategies and techniques: athlete to athlete, older to younger. There was a great deal of mentoring that took place in the gym, which is sorely lacking today. This back-to-the-future manual pushes for a return to old-school attitudes and practices, which were initially championed three decades ago by Nautilus founder Arthur Jones. Jones, with his high-intensity training (HIT), created a bodybuilding revolution in the 1970s. In those days, strong men weren't controlled by steroids. Men were powerfully built because of hard, brief, smart exercise. The middle section of this book contains exclusive interviews of Ben Sorenson, Kim Wood, Jim Flanagan, Roger Schwab, Tim Patterson, Dan Riley, Casey Viator, Boyer Coe, and others from the Golden Age of Bodybuilding. These athletes and coaches share their guidelines and recollections about old-school

discipline, which is the backbone of all result-producing programs. Illustrated are 32 tried-and-proved routines, including the Best of the Best. All the routines adapt easily to free weights and/or machines. In the final section, Dr. Ellington Darden personalizes HIT by connecting with his Web site: DrDarden.com. Trainees are directed on how to use a camcorder, make a video of their routine, and upload it for critical evaluation. In return, Dr. Darden tweaks the workout, with his experienced recommendations on proper form, duration, and frequency; and then, follow-ups with each trainee for ongoing results. Take the long-ignored techniques of the masters, Dr. Darden says with conviction, combine that with today's science, and you've got *The New Bodybuilding for Old School Results*. Bodybuilders and strength athletes everywhere will benefit from this learn-from-the-past/accelerate-to-the-future plan. *The New Bodybuilding for Old-School Results*: Trade paperback, large horizontal format, 10.75 x 8 inches, 34 chapters, 194 black-and-white photographs, 352 pages, \$29.95 US, \$39.95 CAN. Available: December 5, 2005. Ellington Darden, Ph.D., is the author of 46 fitness publications, including the bestselling *The Nautilus Book*, *The Nautilus Diet*, *Living Longer Stronger*, and *The New High-Intensity Training*.

The Sports Gene - David Epstein 2014-04-29

The *New York Times* bestseller - with a new afterword about early specialization in youth sports - from the author of *Range: Why Generalists Triumph in a Specialized World*. The debate is as old as physical competition. Are stars like Usain Bolt, Michael Phelps, and Serena Williams genetic freaks put on Earth to dominate their respective sports? Or are they simply normal people who overcame their biological limits through sheer force of will and obsessive training? In this controversial and engaging exploration of athletic success and the so-called 10,000-hour rule, David Epstein tackles the great nature vs. nurture debate and traces how far science has come in solving it. Through on-the-ground reporting from below the equator and above the Arctic Circle, revealing conversations with leading scientists and Olympic champions, and interviews with athletes who have rare genetic mutations or physical traits, Epstein forces us to rethink the very nature

of athleticism.

Younger - Sara Gottfried, M.D. 2017-03-07

Age is a number, aging is a choice The scientific reality is that ninety per cent of the signs of aging and disease are caused by lifestyle choices, not genes. Why then do so many of us still feel destined for cellulite, saddle bags and belly fat? Why do we worry about the long line of Alzheimer's, cancer and heart disease in our families? Why do we tolerate sagging skin, flagging energy and lowered libido as we grow older, writing them off as inevitable? We are not victims of our age. Our symptoms are both controllable and avoidable. There is a way to slow and even reverse the signs of aging, combat genetic illness, control and determine the expression of genes and improve health as we age. We have the capability to overcome and transform our genetic history and tendencies. In Younger, Harvard/MIT-trained physician Sara Gottfried, MD, has created a revolutionary seven-week program that empowers us to make the critical choices necessary to not just look younger but also to feel younger and live longer.
